Vol. 20

Chinook, Alberta, Thursday, January 9th 1936

No. 35

Feather Pillows	each	.85c
Cotton Comforters	each	\$2.45
Yama Cloths	per yard	.33c
Men's Felt Boots		\$2.10
Writing Tablets & Envelopes		.25c
Walnut Fresh Halves		.40c
89 lbs. Mother's Flour		\$3.29
Tomatoes (Fancy) 2 1-2	6 for	.70c
Black Figs	2 lbs. for	.23c
Prunes 50-60	2 lbs. for	.23c
Onions	8 lbs.	.23c

Acadia Produce Co.

The Ladies Card Club met Tuesday evening at the home of Mrs. Lee. Honors went to Mrs. Robinson and Miss Kain. The club will meet next week at the home of Mrs. Milligan with Miss Mildred Milligan as hostess.

Miss E. L. Johnston returned to Chinook Sunday morning, after spending the Xmas holidays with her parents in Calgary.

Miss K. Kain who has been spending the vacation at Leduc returned Sunday morning.

Miss R. Jensen arrived in Chinook Sunday after having spent the Xmas holidays in Stettler.

A number of young people from Chinook and district attended the dance at Cereal on Friday, January 3rd.

Mrs. M. C. Nicholson, who has been visiting with her son at Lethbridge returned home Sunday morning.

Miss Elliott, teacher at Rearville school returned from her holidays Sunday morning.

Mr. and Mrs. Lester Dressel and Wilton Dressel left Tuesday night for Morrin.

Miss Ruth Bowd who has been visiting with her sister Mrs. Youell, over the holidays, returned to her school near Sedalia on Saturday.

Mr. A. Spreeman who has been in Ferintosh for some time returned to Chinook Sunday morning.

Mrs. J. C. Turple and two sons, Glen and Rex, returned from a holiday in Hanna last week.

John Allen left Saturday night for Olds where he will resume his studies at the Agricultural School.

Mrs. Walker, teacher at Swan School returned from her holidays Sunday morning.

Mrs. A. V. Youell left Tuesday morning for Calgary where she will visit for a short time.

Mrs. Nicholson who spent the Christmas and New Year's vacation at the home of her son, A. St. Clair Nicholson, of Lethbridge, returned Sunday morning.

Miss Marjorie Thompkins spent the Christmas holidays with her parents, returning to her school Saturday.

The annual meeting of the Friendly Circle was held Wednesday at the home of Mrs. L. Cooley. Mrs. Stewart, Secretary of the club gave the report of the year's activities, also the financial report, both of which were found satisfactory. A delicious lunch was served by the hostess. Mrs. Lee was unanimously chosen to be Secretary for the ensuing year. Mrs. Robinson entertains the club in February.

Penmans Silk Hosiery	per pair	.79c
Latest Shades		
Robin Hood Farina	5 1-2 lbs.	.25c
Shredded Wheat	2 for	.25c
Family Brand Molasses	No. 5 pail	.39c
Salmon fancy	2 tall tins	.25c
White Naptha Soap	10 Bars	.32c
Prunes	3 lbs.	.32c
Royal Shield Baking Powder	12 oz.	.19c
Cough Medicines		
Rowntrees Throat Pastilles		.10c

## SPORT FLASHES

On Friday, Jan. 3, Chinook won its fourth successive hockey game by defeating a heavier Youngstown team packing plenty of dynamite.

It was a game in which there was action from the first whistle to the end of the game, with never any indication of who would emerge the winners.

Chinook took the lead in the first few minutes of play from a puck off the stick of Harold Stewart. Youngstown came back strong to tie it up and a few minutes later Bill Youell put Chinook one up when he scored the second goal for Chinook. Youngstown again showed their ability to provide excitement when they equalized, making the score 2-2 at the end of the first period.

Chinook scored three goals in the 2nd period; Harold Stewart scoring twice and Bill Youell once. Youngstown scored twice to make the score 5-4 at the end of the 2nd period.

Things began to happen in the 3rd period as Youngstown put on the power play. Bumping and close checking made it the most exciting hockey of the season. Bill Youell waved through all opposition to score his third of the game. Youngstown, two down got the puck and did some fancy shooting at the Chinook goal scoring once and giving the spectators a real treat. The final score was Chinook 6; Youngstown 5.

The Chinook Intermediate Hockey boys played a much improved Cereal team, defeating them to the count of 8-3 on Cereal ice January 2.

The score however was no true indication of the play. Cereal fully deserving a more even score. Chinook scorers were Bill Youell 4; Maurice Massey 2; and both Earl Robinson and Leonard Youell getting through the defence for a goal each.

Mr. Meeres was the referee.

White Fish	per lb.	.09c

THE EVER-WIDENING WAVE CIRCLES, OR THE JUBILEE, OF THE "LAST SPIKE"

The reverberation of the driving of the last spike of the world's greatest transcontinental enterprise has not yet ceased entrailing the world in the interest of Canada and humanity in general.

A. C. Roney in the Montreal Daily Star, Nov. 12, 1925.

## CROP TESTING PLAN

Over 20,000 farmers' fields of wheat have been tested under the above plan during this past month. Some 6,000 samples graded "A," indicating they were sufficiently true-to-variety to be used for seed. Any National Elevator Agent will supply the names of those farmers in your district whose samples graded "A."

## Disease and Death

Technocrats, engineers and scientists have said more than once recently that research work in the laboratories and workshops of the world have brought such a rich harvest in discoveries that the fruits of their work have far outrun man's ability to turn them to immediate use in enrichment of everyday life. This, it is said, is largely due to the lack of sufficient purchasing power.

This general premise is undoubtedly correct. Discoveries in the scientific realm during the past decade have been overwhelming in number, scope and future potentiality, and not the least interesting and important is the last-mentioned. For, experience shows that every new discovery opens up wide vistas for future research, paving the way for further discoveries and yielding visions of more and greater use which the earlier experiments can be made to yield for the comfort and welfare of humanity. There is, at any rate at present, no cul de sac in the scientific field.

Not only is there no apparent terminal, but the more the scientist and research worker reveals, the more he is assured that he knows very little, that so far the surface has been barely scratched, and that the realms yet to uncover and conquer are almost limitless. The finite knowledge of the present points far into the infinite with inexhaustible treasures yet to find.

While this is true in all fields of scientific discovery, in no sphere is it more true than in the realm of medical science. Medical science and surgical skill have made tremendous and important advances in the past few years, but while much has been learned, while many new and valuable methods of preventing, curbing and eradicating disease have been discovered and pressed into service for the alleviation of suffering and prolongation of life, just about enough has been achieved to demonstrate that much more will be learned and much greater results will be accomplished in the next few years, provided the work that is now being prosecuted with vigor and enthusiasm is not subjected to some unforeseen setback.

Until quite recently scientists in the medical and surgical fields have been chiefly concerned with perfection of technique in applying known methods for control and eradication of disease, with preventive and safeguarding devices and practices, with the search for cures for the most prevalent killers, such as heart disease and cancer and with the development of palliatives for pain.

In all these fields remarkable work has been done as is easily demonstrable in the case of tuberculosis. The progress that has been made in dealing with this and other diseases, in the prevention of loss of life in maternity and in the protection of children in the first few months of life, even since the Great War, has resulted in increasing the span of life expectancy, though, to date, this is principally due to the savings that have been made in infant mortality.

However, it appears that we may be upon the threshold of further discoveries that will benefit mankind in the later years of life's span. A vigorous drive is being made by science against those diseases which are taking heavy toll in middle life and old age, and more especially is the hunt for an antidote to that great and painful scourge, cancer, in full cry.

While still in the experimental stages, "ensol" has brought hope that a specific cure for cancer has been uncovered. It has been demonstrated that at least this new remedy has robbed the disease of some of its attendant pain and there are hopes that it may turn out to be the long-sought cure. It should be pointed out, however, that disappointment ensue, that the efficacy of ensol as a definite cure remains to be proven.

Experimentation with ensol, so far, is confined to a two year period and eminent practitioners declare that another three years must elapse before its success or failure can be pronounced.

While the object of all this work is to prolong the span of human life, medical science is not satisfied with such great achievements as research has already yielded, but is looking further ahead, even to the extent of endeavoring to lift the veil which shrouds the mystery of life and death.

Experiments along this line have yielded extraordinary results. Dr. Alexis Carrel of the Rockefeller Institute, for example, has kept a chicken's heart alive, apart from the body, for 24 years and this scientist recently predicted the possibility of suspending human life and starting it again several centuries later. Such experiments open up a vista of fascinating possibilities, but this same authority, while confident of great advances in the future expresses his firm conviction that "there is no hope of ever conquering senescence and death," though admitting the possibility of suppressing disease entirely in the future.

In other words man may conquer disease, but he will not be given dominion over natural decay and eventual death, in the opinion of this noted savant.

### Victim Of Science

#### Inoculation Slip Causes Death Of Assistant In Laboratory

Medical science claimed the life of Anna Pabst, young laboratory assistant at the National Institute of Health, who contracted meningitis in line of duty.

Miss Pabst, an experienced technician and co-author of several scientific articles, was inoculating an animal with meningitis culture on December 17, when the animal moved and some of the culture squirted into her eye.

All praise to the hen. She was the first to provide a sanitary covering for her product.

Just rub on VICKS VAPORUB

ACTS TWO WAYS AT ONCE

### Holds Responsible Post

#### New Zealand High Commissioner Was Once London Constable

The life story of the new high commissioner for New Zealand in England reads like one of those early tales of men who went out to the colonies and made good. It is a story with a Henty touch.

William C. Jordan is going back in some triumph to London, the city of his humble birth, a city whose streets he once walked—in blue. Mr. Jordan has been alternately coach-painter, postal clerk and police constable. In 1904 he migrated to New Zealand and tried farming, then business. In 1912 he became M.P. for Manakau, and was president of the New Zealand Labor Party for 10 years.

Mr. Jordan's story is as good an argument for democracy as we have run across for some time.—Hamilton Herald.

#### Makes No Difference

Another couple has been married in an airplane. The consensus of opinion among our bachelor friends is that the groom comes down to earth just as quickly as though the ceremony took place on the ground.

Education helps. If you couldn't read you wouldn't know what wrongs you are enduring.

The "Pony Express" was not run with ponies, but with the most virile breed of horses.

### Trans-Atlantic Air Service

#### 1936 To Inaugurate Biggest Advance In History Of Flying

The Santa Maria will take wing this year.

Trans-Atlantic transport service by airplane will be in the making in the next summer flight of an air-liner across the ocean over which Christopher Columbus sailed his flagship almost 450 years ago.

With the projected voyage will come fresh international races for markets as the world's air routes become trade routes.

This year, say air transport companies, will be the biggest in the history of flying since the Wright brothers lifted their kite-like, spoked-entrapment off the sands at Kitty Hawk in 1901.

A 25-ton flying boat of Pan-American Airways will ease out over the Atlantic under the impetus of four roaring motors to pilot the course of the future trans-Atlantic air voyager.

American airplanes in the transport field already are prepared to inaugurate airmail and passenger service.

The routes are not the problem. It is competition. United States aviation on the Atlantic meets the challenge of those nations which will be United States neighbors when the service gets underway.

The United States does not "nationalize" subsidize heavily its commercial air fleets. In place of that, American industry and business men have effected a "commercial nationalization."

The one trans-ocean air transport company of which the United States boasts is financed jointly by widespread American industrial and business interests.

Its flying boats were built behind locked doors. The secrets of their construction have not been divulged.

Although trimmings were turned down on trading of patents with other nations' air lines, trans-Atlantic fleets will be of necessity the result of co-operative effort. Otherwise ports of entry would be barred.

Charting flights probably will start about mid-year, inauguration of airmail service is likely before 1936 closes, and carrying of passengers soon will follow, aviation leaders predict.

### Price Will Be High

#### Certified Grades Of Crested Wheat Grass Are Available

Work at the Dominion Forage Crops Laboratory at Saskatoon during the month of November, 1935, was largely confined to purchasing seed supplies for use in connection with the various projects of grass development to be undertaken in the spring of 1936 under the Prairie Farm Rehabilitation Act. Moderate quantities of registered and certified grades of crested wheat grass are available, but at a relatively high price. There are adequate supplies of seed of other grasses and legumes available.

### Mass Marriages In China

Mass marriages sponsored by the municipal government are becoming popular in Shanghai, China. More than 140 brides were united with their respective husbands recently, conducted by the mayor.

### Money In Stone

Monumental and ornamental stone masons in Saskatchewan earned \$28,026 in salaries and wages during 1934 while the value of their products was estimated at \$72,214.

### Was Remarkable Figure

#### Venezuela's Late President Will Be Hard To Replace

The most powerful Dictator in South America is dead. With the passing of Juan Vicente Gomez, President of Venezuela, there vanishes from the scene one of the most remarkable figures of contemporary politics. Born a cattleman, he joined Cipriano Castro in a revolution which was successful and which put the beetle-browed little Castro in the presidential chair. Gomez was content to remain his chief aide, but he commanded the army and he was in reality the power behind the throne. When Castro went away on leave of absence in 1908 he signed his own death warrant. Gomez warned him not to return, pretending to be much concerned about rumors of plots against Castro's life!

Ever since then Gomez has ruled Venezuela with an iron hand, smashing ruthlessly any attempt against his power, giving the country a settled policy, building up its finances—Venezuela is the only nation in the world without a nickel of external debt—and making things attractive for foreign capital, so that British investments in the country increased from \$45,550,000 to \$131,860,980 in the four-year period prior to depression, and in 1933 the value of her exports was five times that of her imports.

The masterful dictator disliked crowds, and seldom went to the capital, Caracas, preferring to live a lonely and secluded life on his country estate. Many Venezuelans have never seen him. But he had his ear to the ground 24 hours a day, and he knew everything that was going on. He gave his country a long period of peace, but of course he made hosts of enemies, for his methods were simple but drastic. Those he could catch, he shot; those who could escape from the country remained in exile. But in losing Gomez Venezuela has lost a ruler it will be extremely difficult to replace.—Montreal Star.

### Canned Blood

#### Weird Discovery Listed As Major Accomplishment Of 1935

The weirdest discovery of the year—"canned blood"—was listed by professional authority as medicine's foremost accomplishment of 1935.

A process of taking blood from the bodies of the dead and preserving it to save other lives through transfusions was placed first in a "year book of fame" compiled for the Associated Press by Dr. Morris Fishbein, editor of the Journal of the American Medical Association.

Russian doctors and chemists devised first rank for developing the "canning" method and using it successfully in more than 1,000 cases, the editor said.

### Snow Traps Golden Eagle

#### Unable To Rise From Ground After Diving For Rabbit

A golden eagle was killed near Fridlin, Alta., when it was unable to take off in soft snow after diving for a rabbit. Clayton Tompkins, of Calgary, shot the bird as it thrashed around in the drifts. The eagle had a wing spread of seven feet, two inches.

In preparation for a take-off, the eagle must spring into the air sufficiently for the wings to clear the ground. The deep, soft snow prevented the preliminary jump and each successive effort served only to heighten the bird's predicament.

### Should Stand By League

The business of this country says the Manchester Guardian is to stand with the members of the League, confirming their loyalty, giving them the evidence that it can of its friendship—both in this and in a broader field, for we ought to turn to good use this new international unity—and maintaining patently the principle that the League must hold on until justice is done.

### Sending Boys To Queensland

Arrangements are being made to send 10 Boy Scouts to Queensland every month from Great Britain. This announcement was made by the Settlers' League. In London negotiations are still in progress with the federal government for financial assistance, under the settlers' agreement, for the boys' passages to Queensland. On arrival, the boys will be given occupations, chiefly in farming.

### Living In Caves

More than 1,200 persons make their homes in artificial caverns their ancestors cut out of the limestone cliffs bordering the Loire river in France. Many dwellings are equipped with gas, electricity and radios.

Addis Ababa is the chief coffee market in the interior of Ethiopia.

NOTE—The Royal Bank of Canada (France) has been incorporated under the laws of France to conduct the business of the Bank in Paris, and the assets and liabilities of The Royal Bank of Canada (France) are included in the above General Statement.

M. W. WILSON, President and Managing Director. S. G. DOBSON, General Manager.

AUDITORS' REPORT

TO THE SHAREHOLDERS, THE ROYAL BANK OF CANADA: We have examined the General Statement of the Royal Bank of Canada for the year ended 30th November, 1935, with the books and accounts of The Royal Bank of Canada at Head Office and with the certified statements of the Branches. We have also examined the securities held by the Bank and the Bank's investments held at the Head Office at the close of the fiscal year, and at various dates during the year, and we have also examined the information and explanations as to the same.

Our opinion is that the General Statement of the Royal Bank of Canada for the year ended 30th November, 1935, is a true and correct statement of the affairs of the Bank, and that the assets and liabilities of the Bank are correctly stated.

Attest: J. G. ROSS, C.A., Auditor. W. G. WATSON, C.A., Auditor.

Montreal, Canada, December 24, 1935.

### Honey Export Heavy

#### Saskatchewan Shipped Seven Tons To Britain Last Year

Production of honey in Saskatchewan during the past year showed an increase of 59 per cent. over 1934, according to figures from the department of agriculture. The total yield was 1,034,000 pounds. The large increase was due to the increased number of bee keepers and to the increased number of bee colonies. Export of Saskatchewan honey to Great Britain this year amounted to seven tons.

In imitation of the American magazine Esquire, an English publisher has launched one called Men Only. As far as picking punch names is concerned, it looks like a dead heat.

### Purity Flour means real economy. It goes farther. Rich in nourishing gluten, it makes bread that rises right up out of the pans—and the most delicious biscuits, cakes, pies and flaky pastry ever baked!

## PARTY FLOUR

Best for all your Baking

A silkworm's cocoon may unwind to a length of 600 yards.

# Find Out

From Your Doctor  
if the "Pain" Remedy  
You Take Is Safe.

Don't Entrust Your  
Own or Your Family's  
Well-Being to Unknown  
Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches, or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin".

We say this because, before the discovery of "Aspirin", most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this—"Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every label.

LAWRENCE A. KEATING

### SYNOPSIS

Here is an absorbing and exciting story of a fight against stubborn prejudice and a bitter personal malignancy—of a girl and a man battling rife, sabotage, and the treachery that would turn them against each other.

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together for the object of forming an irrigation company.

Roper Kilgo, the boss of the Ravalli and nearby ranges, who seemed to approve the plan, but was really opposed to it, had forced Soak Torney, a derelict mining engineer, whom Kilgo knew would be called upon to give his expert opinion in favor of the scheme, to reverse his earlier endorsement, and declare that irrigation in Boone county so far as Hamilton's plan was concerned, was not a new-fangled way to waste money.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he accuses, tells his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is injured. Buzz is arrested. The doctor attends Townsend and dresses his wound. Kilgo, however, suggests taking Helen to her home, but she refuses and Fleming escorts her home instead. This incident causes Roper to declare open hostility to Fleming.

(Now Go On With The Story)

### CHAPTER IV.—Continued

Fleming's face was illumined momentarily as he lit his cigarette. "I guess you're asking for plain truth. Stephen may send Buzz away for awhile if he can. He's set against

## STOPS ITCHING In One Minute

For quick relief from the itching of pimples, blotches, eczema, rashes and other skin eruptions, apply Dr. Denick's pure, cooling liquid, antiseptic D. D. D. Prescription. Thirty years' world-wide success. Its gentle oils soothe the irritated and inflamed skin, thus aiding nature itself to heal the disorder. No fuss—no mess. Clear, grass-green and streakless—dries up almost instantly. Stops the most intense itching instantly. Try D. D. D. now. A five trial bottle, at drug stores, will prove it's—Genuine Denick. D. D. D. Prescription is made by the owners of ITALIAN BALM.

## PRINTING PRESSES FOR SALE

One Pono Optimum Cylinder Press, one 10 x 15 and one 10 x 10 Chandler & Price Gordon Press. Also 20-inch Galleon Press. Cutter and one Linotype machine. All in excellent condition. Apply Box 326, Regina, Sask.

shootin', especially in town. Sort of anxious to make an example of everyone that does it. Ames is a mighty good law officer and he figures to keep trouble down by actin' kind of harsh. I'll sure do some-thing 'bout it if I can, but Ames goes his own way. Nobody can talk him out of anything." He was thinking that not even Kilgo could swerve the stern law officer.

The girl nodded, her slender fingers held worriedly to her lips. "Perhaps," she murmured softly, "it will do Buzz good. Oh, I know how he is—he's weak. Buzz is easily led, and I just have a feeling he has come under the influence of someone the last two years, someone very strong-minded. It seems a terrible thing to say, and I don't want you brother put in prison." A shudder escaped her lips. "But—well, perhaps punishment, a small amount of it, will make a new man of Buzz."

"That's what might happen, and I sure wish it would. I'll do anything I can for you while he's gone, Helen. I mean like helpin' with the Triple H."

"Thank you." Then thoughtfully: "I shall be in charge of the ranch, shan't I? I suppose I can do anything necessary to improve it or keep it up."

About to mount his horse, Fleming paused. He squinted inquiringly at the lissome girl standing a few feet away, her face partly visible, partly in shadow. "What do you mean?"

"Why, Buzz and I own nine hundred acres out in the draw, don't we? Useless, barren land. Right next your seventeen hundred acres. How much do you suppose it would cost to dig irrigation ditches all through it, and build a small dam backing up Silver Creek into a sort of lake?"

With a low exclamation he dropped his reins and stepped nearer, to peer startledly down at her. "Do you mean you'd go against the advice of the only man who really knows irrigation around here—Torney?"

And the advice of your own brother? And your—well, Kilgo?"

Helen tossed her head. "I don't know. How much do you think it would cost?"

"Offhand I'd say fifteen thousand dollars."

The girl placed a hand at her throat. "I have the first thousand right here, Link. If the others don't want to come in, we could form a partnership, couldn't we? Now don't you think you'd better go home?"

As he rode up to the corral on his own ranch, Fleming still was immersed in thought of the plucky girl's offer.

He reflected that she could not realize the weight of public sentiment against them. Everybody, ever eager to wag their tongues in speculation, would hint that the Star Loop owner had "talked Helen into it."

Dismissing the unassailable his backside, and turned the animal into the corral. With saddle and bridle in his arms he started toward the ranch house. Yes, everyone would be dead set against it. There would be gossip aplenty that Link had persuaded Helen against her will, free prediction of bankruptcy and ruin.

He stopped suddenly. The saddle fell from his grasp and his hand sought the holstered skunk on his side.

"Don't get tough, Link—it's me, Roper." A short, thick figure detached itself from the shadow of the low stoop and Kilgo stepped toward him, his eyes gleaming, grinning.

"Just wanted a little talk with you," he went on easily. "Didn't want to scare you, Link."

"I see." Surprise at the unexpectedness of the visit was masked in his next words. "Why sure, Roper, let's get inside and have a light."

He picked up his saddle again and carried it to the stoop. Lending the way into his four-room clapboard ranch house, he lighted an oil lamp on a centre table of the living room. "Make yourself at home," he invited his guest.

Kilgo appeared to have something on his mind. He stood fingering his cartridge belt while he shifted weight. "Say, Link, this here is kind of a hard thing to talk about. Fact is," he blurted out, "I planned on ridin' home with Helen Hamilton when she came. I mean, it kind of took the wind outa my sails when you went gallivantin' off with her."

"Yuh see, Helen and I—Before you bought the Star Loop, I'd known her quite a spell. Always got along together good and all that. Some folks around the county'd tell you we're as good as engaged."

"That so? I didn't get quite that impression."

## Royal Bank Presents Strong Annual Statement

Deposits Up \$51,000,000—Marked Improvement Evident  
Last Year Continues

The Annual Statement of The Royal Bank of Canada reflects a very substantial growth during the year. Assets have creased the eight hundred million dollar mark, being actually \$800,919,000. Deposits show an increase slightly greater than the rather remarkable increase shown in the previous year.

Assets have increased during the year by over \$42,000,000. That the growth of total assets is somewhat less than the increase in deposits is apparently accounted for by the fact that the special loan of \$9,000,000 under the Finance Act, current at November 30, 1934, has been repaid.

**Strong Liquid Position**  
In these days of easy money, no great emphasis is placed by the banks on liquidity but actually immediately realizable assets are 58% of total liabilities to the public. Investments in Dominion and Provincial securities show an increase of \$3,749,525, which is in line with recent trends in banking, not only in Canada but in the United States and Great Britain as well. The banks have never been in as strong position as they are at present to meet commercial demands as these develop.

**Deposits Largely Increased**  
Deposits registered a growth of \$51,000,000 and now stand at \$688,966,512. A decrease in interest-bearing deposits is noted. It is understood that this does not indicate a reduction in Savings deposits in Canada, which have actually increased sub-

stantially, but is accounted for by the discontinuance of the payment of interest on a large proportion of the bank's deposits outside of Canada. It is no doubt a reflection of greatly improved business throughout the country that the growth under this heading during the past two years has been no less than 17%.

**Commercial Loans Up**  
Commercial loans show a moderate increase of \$2,058,882, which is encouraging when it is taken into consideration that general experience has not yet indicated that demand for new loans has more than offset liquidation of slow advances carried in the depression. Call Loans in Canada have increased by \$2,898,032 but Call Loans abroad are down \$1,690,196. As is well known, the yield on such loans in London and New York is about at the vanishing point.

**Profit and Loss Account**  
Profits for the year amounting to \$4,340,522 show a slight decrease but were sufficient to provide for \$2,800,000 in dividends, \$200,000 for transfer to Bank Premises account, \$200,000 to be applied to the Officers' Pension Fund and \$1,697,772 for Dominion and Provincial Government taxes, leaving a surplus of \$102,700 to be added to Profit and Loss Account, which now stands at \$1,899,254.

The Annual General Meeting of the Shareholders will be held at the Head Office of the bank in Montreal on Thursday, January 9th at 11 a.m., when the report for the year ended November 30th will be submitted.

He flashed a quick look. "Course I know you wasn't wise to it. It makes me plumb sore to have interference, Link—like it does any man, I reckon. I'm known for a guy that don't allow interference. Specially with steers and girls. Yes, we're just about engaged, all right," he repeated significantly.

There was a short pause. "She's mighty nice. Pretty, too. Noticed that myself, first look I had of her." Kilgo's eyes were evasive. "What I'm gettin' at is, I don't care to have you mix in my personal affairs, Fleming."

There was a tenuous edge to his tone that the rancher did not miss. He tossed his hat on the table and rested a thigh over its corner. Swinging his leg idly, he examined Roper with keen, understanding eyes. It was a plain warning, a coming-out that he had just issued, and it rubbed Fleming the wrong way.

"Seems almost like this engagement business is one-sided," he drawled. "However, I haven't any intention arguin' the matrimony question. By the way, Helen and I may go into partnership."

He started. "What do yuh mean?" "When, when folks go into business together, that's called a partnership. That seventeen hundred acres you let me win in a crooked poker game some time back needs work. It's going to be worth a hundred, maybe two hundred an acre some day for alfalfa. Helen'll be in charge of the Triple H now, and she has more advanced ideas than Buzz. We're thinkin' of pooling our resources to put on an irrigation project of our own, seeing you and the others don't believe in good old-fashioned water."

The effect of this announcement was startling. Kilgo's jaw went slack and his eyes rounded in wonder. A low growl seemed to start in his barrel-like chest, finally to burst from his lips with rage.

"Damn you!" he roared. "Yuh'll never do it!" Suddenly lifting one pudgy hand, he snatched off his sand-colored sombrero.

The sharp crack of a rifle was followed instantly by tinkling glass. Some impulse forever unexplained had made Fleming jump from his seat on the table edge as Roper grabbed his hat. Perhaps he thought the visitor meant to whip out his six-gun—Link could not tell afterward. But the next moment the mass of brown hair on his head flicked sharply. The bullet's next sent a light breeze along his temple and instinctively he ducked. With a low thud the slug buried itself in the far wall.

"Don't move!"  
Brittle with stern tenacity, Fleming stared down the barrel of his forty-five.

"Don't make another signal, understand? Get over there—against that window. If anybody's going to get shot by your skunk assassin, it isn't going to be me!"

He was safe from windows, himself. "What the devil yuh talkin' about? Yuh mean to say—"

"Grabbin' your hat was a signal. Some gent outside was waitin' for it. He tried to murder me. That's what I'm talkin' about, Roper!"

The Box 60 owner's round, red face dulled. If it had not been that Link was covering him, watching his every move with hawk-like vigilance, he would have drawn and slain his

## Everyone Will Take Chance

Dieticians Say Only Heavy Worker  
Should Eat Plum Pudding

The glorious, steaming plum pudding, tail-end of every traditional Christmas dinner, stands convicted as nutritionally incorrect and far too heavy for anyone whose task is lighter than ditch-digging in this work-a-day world.

The judges were Mrs. E. B. Rutter, professor of Household Science at the University of Saskatchewan, Saskatchewan, for many years, and Dr. J. S. Brown, specialist in children's ailments.

It was Dr. Brown who made the reference to ditch-digging. After condemning plum pudding as "really a terrible pudding," a plateful of which was a meal in itself, the specialist admitted the meal should depend upon "size of the eater."

"For a laboring man, digging ditches, there would be no harm in a meal of turkey, plum pudding, nuts and candy," he added, as usually, the meal became "really terrible" from a scientific nutritional point of view.

"Of course one cannot apply the dictates of nutrition to a traditional meal," Mrs. Rutter admitted. "Perhaps it is all right once a year, but it would be far better to follow the roast turkey with a light frozen dessert and have the pudding the next day with a little cold turkey."

"Of course there are plum puddings and plum puddings," Mrs. Rutter went on. The tendency now is to replace some of the suet by grated raw carrots and potatoes. The pudding need not be so highly spiced. Such puddings are far better for children."

Remember not the sins of my youth, nor my transgressions; According to Thy mercy, remember Thou me, for Thy goodness's sake O Lord. Psalm 25:7.

When on my aching burdened  
My sins lie heavily;  
My pardon seek, new peace impart,  
In love remember me.

We need to know that our sins are forgiven, and the only way we can know this is to feel that we have the peace of God, that we are so able to trust in the divine compassion and infinite tenderness of our Father we are able to go to Him whenever we commit sin and say at once to Him "Father I have sinned, forgive me."

To know we are forgiven it is only necessary to look at our Father's love until it sinks into our heart, to open our soul to Him till He shall pour His love into it, to wait on Him until we find peace, till the weight of responsibility ceases to be an oppressive burden to us, till we can feel that our sins, great as they are, cannot keep us away from our Heavenly Father.

Vacuum Tubes Blamed  
United States Naval Radio Experts Give Cause Of Radio Interference

United States naval radio experts blamed an important tool of the medical profession for a persistent "shadow" interference with their high-frequency broadcasts.

Vacuum tubes used in X-ray and other machines by physicians were identified as the source of a tone heard principally on frequencies between 11,000 and 20,000 kilocycles.

The federal communication commission has been requested to control or eliminate the cause of the interference.

## ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child  
an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons instead of their doctors—on remedies for their children.

If they knew what the scientists know, they would never take this chance.

**Doctors Say PHILLIPS' For Your Child**  
When it comes to the frequently-used "milk of magnesia," doctors, for over 20 years, have said "PHILLIPS' Milk of Magnesia," the safe remedy for your child.

Remember this—And Always Say "Phillips'." When You Buy, Your child deserves it; for your own peace of mind, see that you get it—Genuine Phillips' Milk of Magnesia.

**Also in Tablet Form:**  
Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

**PHILLIPS' Milk of Magnesia**  
MADE IN CANADA

## Infantile Paralysis

Rockefeller Institute Reports Method  
To Deal With Scourge

Discovery at the Rockefeller Institute of a new wash which protects monkeys from infantile paralysis and is now ready "for trial in man" was reported by the Society of American Bacteriologists at its opening session in New York.

A second, entirely different sort of infantile paralysis preventive found in vitamin C, the vitamin from oranges, lemons, tomatoes, spinach, cabbage and lettuce was reported from Columbia University. The vitamin at Columbia prevented infantile paralysis in monkeys, but under circumstances so peculiar that the vitamin is not yet ready for trial for children.

Most public schools in Sweden are equipped with bathtubs.

Wooden horses are used for practice purpose by polo enthusiasts.

M. L. CHAPMAN, Chinook

The Women's Institute met at Mrs. Rideout's home on Friday, January 3. The sum of \$10.00 was donated to the Cereal Hospital.

It was decided to make another "Mothers bundle" and preparations for it are started. The first lesson on "Home nursing" was read and discussed.

The topic for the afternoon was "Education and Better Schools" and Mr. Meeres was the speaker, giving a splendid address on "The Value of Education."

The magazine contest put on by Mrs. Wilson was very interesting and won by Mrs. Chapman.

At the close of the meeting a dainty lunch was served.

## Correspondence

Dear Editor:

With all sincere regards for your kind permission, it appears that the Columnist under the Nun De Plume of observer, be granted permission to roam at large, this being the season of open range, up and down the columns of your publication. I greet this with surprising pleasure, for evidently, it is quite obvious that there is a certain amount of old growth, municipal, that should be pastured off before annual roundup, or someone may put a lighted match to it. Sniping from "Opis" with an old muzzle loader, loaded with limberger cheese, tramped down with a political ramrod, on the open range will, in my opinion, have its lachrymose effects, or, perhaps even a backfire. However, since the cheese has been drawn from quarantine and issued to the Advance's own war correspondent or the gentleman procured it by other means; it could be possible the cheese followed him, leaving observer mercilessly, with nothing more than his fleecy lined, but on the range in this zero weather?

However good limberger will always find its way home no matter how many red herrings are drawn across.

Observer picks up his old muzzle loader, "commends the present government on the increased efficiency of administration." Then, closes his eyes and pulls the trigger, and bang! goes a charge of limberger condensed and sympathy. Hoping that the supporters of Social Credit should not suffer from cold feet this winter due to the fact that they have discontinued giving overshoes in relief clothing this winter. No doubt this will increase the effort on the part of the recipient. It is this word "recipient" that has its cheery aromatic tendency. Perhaps Observer could enlighten this reader and others to the full meaning of the word; Does this include the dam sight choosers, or is it only directed at those who worked three days for one day's pay? Am I to suspect that observer also received the gratitude of our local authorities, since his limberger has been moved to warmer quarters where he can view its antics at leisure, May I sound a note of warning here! please be careful! because limberger when overheated is the very old Nick himself when it mixes with the fleecy lined, an absolute perplexity in itself, when one has only one suit and no blankets: I wrote a poem entitled entitled "Evolution" some years since as limberger is cheese, the truth will out.

Load up the old muzzle loader again with truth, facts and figures not obscure "apologies" hints, half quotations and vague seed grain by laws that balance the budget. Tell us what you know, or think you know. If you must expand, expand. If you must explode, explode. The great ago about the fleecy lined and forwarded to our local editor. She apparently thought it was a literary find and deemed that it should go down to posterity, or, incinerator as a masterpiece. I shall only be too glad to furnish another copy of that beautiful verse. I can assure that it is in perfect harmony with the fleecy-lined musings of observer, also being ante deluvian is bound to be interesting. It was an inspiration derived from the beginning of the depression, Babson at that time had just begun to croak; I

mean quote, his admirable phrases, "It's just around the corner," and I believe he is still coating it, and if he lives long enough there is a slight chance that he will be a prophet of no mean order. Other brilliant men must have had the same idea for did they not rub up this the "Old Jolly Rogers" to halfmast on our prairie schemes! Then, and only then did the command ring out in clarion voice. "Stand to" for your fleecy line and sox, one pair per." While I am not apathetic and hate bloodshed, I feel that it is my painful duty to warn you that our young bloods are on the war path, having sharpened their knives and tomahawks and are already counting their scalps that will fall to them at the roundup for in the good book of last year are the minutes of a resolution that have not been complied with. Furthermore, the Big Chief Aberhart of the S. C. tribe says "The municipalities are over governed and requests Consolidation for offering," and this is the rate-payers wish.

I reiterate once more, "beware," read the fiery writing on the wall. Coal, feed, tractor fuel and government relief work; B.I. chazzar's feast is done. For as Bernard Shaw says, people who say or think they must expand or explode, will most likely be told to explode be damned. If I have diagnosed your symptoms correctly then shoot, or shall we, like the ladies south of town who penetrated the camouflage of the bachelor by concealing the honors of a cheesy debate and then went happy home, singing.

There's an old adage that women believe  
A man is a mouse when he steals his cheese  
"Cheese" "Hall"

## NOTICE

The Annual Meeting of the Ratepayers of Chinook Consolidated S. D. No. 16 will be held in the School on Saturday, Jan. 11th, at 1:30 p. m. for the purpose of discussing the affairs of the district and for electing the necessary trustees.

## Most Especially Conducted

The Captain and the crew, the ship's Doctor, and more particularly the kindly, motherly stewardesses of the Canadian Pacific liner Montclare all shared the responsibility of personally conducting the recent trans-Atlantic journey of Mary Estella Barr, of Halifax. Mary Estella has six months of very active life behind her, and the best wishes of the Montclare's personnel for many happy years to come. The journey was necessary because Mary Estella is motherless, and her father, Peter Barr of Halifax, though unwilling to part with his baby daughter, yielded to the wishes of his parents in Leith, Scotland, to send the baby to them. Her grandparents met her at Glasgow.

## Wedding Bells

AGGETT-OVERAND

OKOIOKS (Special) — A pretty wedding was solemnized on New Year's Eve at 7 o'clock in the United church, Okotoks, when Margaret Isabelle, eldest daughter of Mr. and Mrs. W. W. Overand, of Okotoks, became the bride of Mr. Courtland John Aggett, of

Mr. W. A. Sharp, 73 years of age passed away Tuesday, December 31st at his farm 12 miles from Champion. The cause of the death was a sudden attack of high blood pressure. Funeral services were held in the family residence.

DeWinton, only son of Mr. and Mrs. C. Aggett of Youngstown; Rev. C. E. A. Pocock officiating.

## Joint Charivari Wednesday Eve.

Young and old people of the town and district turned out on Wednesday evening with noisemakers of every description to charivari two newly married couples.

First they went to the home of Mr. and Mrs. Todd where their daughter Mrs. Rowland and Mr. Rowland, who were recently married have been visiting. After a great deal of noise the newly married couple invited the crowd in. Mae passed chocolates to the ladies while Alvin offered cigars to the men. After singing "For they are Jolly Good Fellows" and other songs the crowd journeyed to the new home of Mr. and Mrs. J. Eaglesham, who were also recently married to give them a jolly welcome to the town. Here again they were hospitably received, Mr. Eaglesham making an appropriate speech.

From there everyone went to the hotel where dancing and lunch were enjoyed by all.

Much praise is due to the young people who donated the splendid music for the dance: Miss Johnston Lorne Rideout, Leonard Youell and Sidney Demaree.

After lunch, which was beautifully donated, speeches were the order of the evening. Mr. W. Gallagher in a short speech on behalf of the sponsors of the charivari congratulated the newly-weds. Short speeches of thanks were given by the two bridegrooms and by the brides.

Mr. and Mrs. Todd have feelingly expressed their appreciation of this token of the good will of the community.

Mr. and Mrs. Eaglesham are residing in the Meade house in Chinook. Mr. and Mrs. Rowland will leave Friday by car for Alderside to make their home there.

Mr. and Mrs. Rowland Massey were at Campion attending the funeral of her father last week.
